Jamie Oliver and his restaurant Fifteen

Jamie Oliver wants to change people's lives, and he uses food to do this. He is a famous chef who teaches people to cook healthy meals. He shares his ideas in a magazine, in cookbooks, and on TV shows. He also helps people through his Italian restaurant called Fifteen.

Fifteen opened in London, England. It was created to train young people for work in a kitchen. Oliver wanted a real restaurant where young adults could get a new start and learn to become chefs.

Every September, a new group of students aged 18 to 24 join Fifteen. At first, most of them do not have the right skills for restaurant work. During the one-year program, they study cooking at college and also practice in the restaurant. They learn to cook with fresh ingredients, and they also try to create their own recipes.

The training is not only about food. The students also learn how to manage money and how to deal with customers. The program gives them confidence and helps them prepare for a future in the restaurant business.

The name Fifteen comes from the first group of 15 students in 2002. Today, Oliver has three restaurants with the same name. A few hundred students have finished the program. About 90 percent of them still work in the food industry. Some own restaurants, some work in famous kitchens, and others even have their own TV shows. They show what young people can do when they are given a chance and support.

Computer Beats Champions

In 2011, on the popular American TV quiz show Jeopardy!, two champions played against a new opponent. Ken Jennings and Brad Rutter had both won

millions of dollars on Jeopardy!. Jennings once won 74 games in a row, the most ever. Later, Rutter beat him in a tournament and made a new record for the most money won on the show. Their new opponent was called Watson. Watson had never played on TV before and had only practiced. In practice games, Watson often gave the wrong answers. This is because Watson was not a person. It was a computer, made by researchers at IBM. In the game, Watson used math and data to choose answers. When the host read a question, Watson got the same question in electronic form. It studied the question and searched in its memory. Its memory was as big as about one million books. From many possible answers, Watson chose one. If it felt 75 percent sure, it gave the answer.

Watson's way of thinking was very different from humans. People often use feelings to make decisions, even when they are not sure. Computers cannot do this. People also watch and listen to other players, but Watson could not do that. In one question, Jennings gave a wrong answer, and Watson later gave the same wrong answer.

Watson also made silly mistakes. In one question about U.S. cities, Watson answered "Toronto". But Toronto is in Canada, not the U.S. An IBM researcher explained that Watson was confused. In its memory, it found that the U.S. is often called "America." Toronto is a North American city, so Watson thought it was correct. Still, Watson won the game easily. The human champions were not angry. They also won money for playing, and the money went to different charities.

A. Write your answers for the questions below.

1. Do you watch quiz shows or game shows on TV? Why?

2. Can a computer be smarter than a human? Why or why not?

3. Have you ever used a computer to help you learn? How?

MY WORKING HOLIDAY

Do you want to go on a holiday and earn money at the same time? Go on a working holiday! Here are three places to try.

A Ski Resort

If you love snow, working at a ski resort does not feel like work. Many workers ski as part of their job and can also ski on the slopes in their free time. This is why many people want these jobs. There are many jobs you can do, like ski instructor, ski lift worker, or cleaner outside. You can also work inside the hotels. The work is fun, but the pay is usually low. Still, for anyone who loves skiing and being outside, this is a great chance!

A Fruit Farm

If you don't mind getting dirty, farm work is a good choice for a working holiday in spring or autumn. The job usually means picking fruit and planting seeds. You might also help make jam and baked food with the fruit you pick, and even sell it at local markets. The pay is not high, but farms usually give free food and a place to sleep. The best thing is that farms are everywhere in the world — in New Zealand, India, Ecuador, and many other places.

On a Yacht or Cruise Ship

Do you want to get paid to travel the world? Try a job on a yacht or cruise ship! You can visit exciting places and even small islands. There are many jobs, like cooking, cleaning, or planning fun activities for the guests. Working on a ship can be hard because there is a lot to do, and you must help many people. You need to work well in a team and stay calm under stress. In summer, ships go to cool places like Alaska. In winter, they go to warm places like the Caribbean. The pay is not high, but the job is very exciting!

A. Write your answers for the questions below.

1. Would you like to work on holiday? Why or why not?

2. Which job sounds better: ski resort, fruit farm, or cruise ship?

3. Have you ever helped at home or worked in a garden?

B. Match the words with their meanings.

- | | | |
|----------------|-------|--|
| 1. Resort | _____ | a) People who visit or stay somewhere |
| 2. Slopes | _____ | b) Food cooked in an oven, like bread |

| 4. Jam | _____ | d) A small, rich boat for travel on water |

On fruit farms, people usually pick fruit, plant 3_____, and sometimes make jam or baked food. Many farms also give free food and a place to 4_____. On a cruise ship, workers must help many 5_____.

A Student Budget

College is an exciting time to study and make friends that can last a lifetime. Many students do not like to think about money. But it doesn't matter if parents pay for everything or if the student works part-time to help. All students can have money problems if they are not careful.

The cost of college can be very high. In English-speaking countries, the average cost for one student each year can be more than US\$15,000. Students must also pay for books, paper, pens, and other things. These can cost \$500 to \$1,000 each year. Students must also pay thousands more for room and food. If you add clothes, travel, and other personal costs, the average price for one year at university can be \$20,000 to \$30,000 or even more.

So, students need to use their money carefully. At most universities, advisers can give students help on how to make a budget.

Here is their advice: At the start of a school term, write down your income — for example, money you get from your family or from a part-time job. Then, write all of your expenses. Put your expenses into two groups: those that change (like food, phone, books, travel) and

those that stay the same (like tuition, room, and food). Add all your expenses together. Are they more than your income? Will you need to borrow from family or friends? Or will you need to earn more money by doing part-time work? Many students find it is easier to plan their own budget and save money,

instead of borrowing from others. As you can see, there is more to learn at college than just what happens in the classroom!

A. Write your answers for the questions below.

1. Do you save money? How?

2. What do students usually spend money on?

3. Is it easy or hard to make a budget?

B. Match the words with their meanings.

- | | | |
|---------------|-------|--|
| 1. Budget | _____ | a) Money you must pay for school or college |
| 2. Adviser | _____ | b) Not full-time; fewer hours of work or study |
| 3. Income | _____ | c) To take money from someone and give it back later |
| 4. Expenses | _____ | d) The usual or typical number or amount |
| 5. Borrow | _____ | e) A plan for using money |
| 6. Tuition | _____ | f) Private or about yourself |
| 7. Average | _____ | g) A place where students learn with a teacher |
| 8. Personal | _____ | h) A person who gives help or advice |
| 9. Classroom | _____ | i) Money you earn or receive |
| 10. Part-time | _____ | j) Things you must pay for |

C. Summary completion (ONE word only from the passage)

The cost of the college can be very 1_____, and students may have money problems. One year of study in English-speaking countries can cost more than \$15,000, plus extra for books, room, and 2_____. To manage money well, students should make a 3_____. At the start of each school term, they must write their 4_____ and expenses. Many students find it easier to plan and save money, instead of 5_____ from others.

Cell phone etiquette

Dear Sunday Globe,

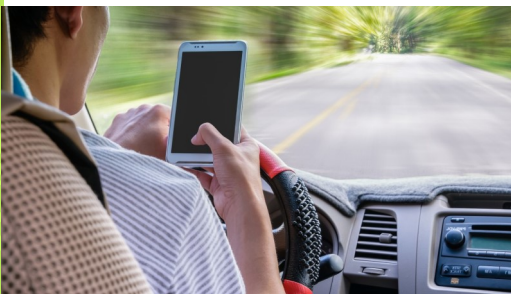

I am writing to you about your article in last Sunday's newspaper, "Cell Phones Make Life Easier." You did a very good job explaining the good things about cell phones: they are convenient, they make us feel safe because we can always call someone, and they are very helpful for business. But you didn't talk about the bad things at all. I hope you will let me give your readers some advice on cell phone manners.

The first point is when not to use your phone. It's polite to turn off your phone or make it silent when you are in class or in a meeting. If you get an important call, you should ask if you can leave the room, and don't talk too long. For conversations that need more time, it is best to ask the person to call back later.

Cell phones can also make you forget the people you are with. I find it annoying when my friends keep checking their messages. In fact, I want to tell them to turn off the phone and enjoy my company!

Another important point is about personal space. I think it is not polite to make calls in small spaces or crowded rooms. This makes other people uncomfortable and forces them to hear your personal conversations. It also disturbs people who are talking face-to-face. That's why I never use my cell phone close to other people, except in emergencies.

Finally, I want readers to think about the dangers of using your phone while doing something else. For example, driving and texting is very dangerous. Also, using your phone while walking can make you careless. You don't want to get hit by a car! Please pay attention to where you are going.

Sincerely,
Amber Jala.

A. Write your answers for the questions below.

1. How often do you use your cell phone?

2. When is it NOT polite to use a phone?

3. Do you think phones make life easier or harder? Why?

B. Match the words with their meanings.

- | | | |
|------------------|-------|--|
| 1. Convenient | _____ | a) Not paying attention, not careful |
| 2. Polite | _____ | b) A situation where you need quick help |
| 3. Meeting | _____ | c) Something that makes life easier |
| 4. Message | _____ | d) Respectful and with good manners |
| 5. Company | _____ | e) Someone being with you |
| 6. Uncomfortable | _____ | f) Not feeling good, uneasy |
| 7. Emergency | _____ | g) Causing harm or accidents |
| 8. Dangerous | _____ | h) Words sent by phone or text |
| 9. Careless | _____ | i) When people come together to talk |
| 10. Annoying | _____ | j) Making you a little angry |

C. Summary completion (ONE word only from the passage)

Amber Jala wrote to the Sunday 1_____ about an article on cell phones. She agreed they are useful but also wanted to talk about bad manners. She says people should turn off their phones in class or a 2_____. Friends who always check their 3_____ can be very annoying. Making calls in crowded rooms makes people feel 4_____. Finally, she warns that texting while 5_____ or walking can be dangerous.

SMARTPHONE APPS FOR TRAVELERS

Are you traveling soon? Smartphone apps make travel easier than ever. But with so many new travel apps each month, it can take time to find which ones are really good. Here are three apps that will help you on your next trip abroad.

Talk to Me

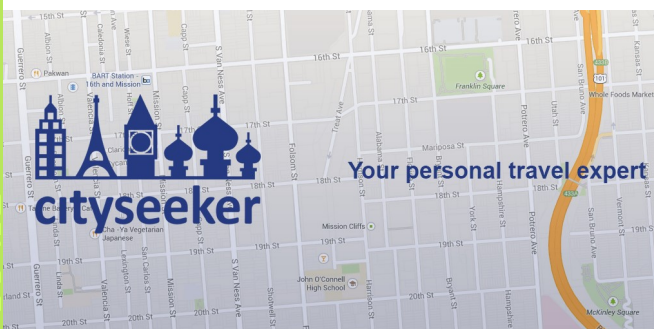

Say goodbye to language books after you download the Talk to Me app. This is a great tool for people visiting another country — it works like a translator in your pocket! When you speak English into the phone, it changes your words into another language. You can choose English, Chinese, French, Spanish, German, or Italian. This app is useful for tourists, business people, and people learning languages.

Tripit

Do you sometimes lose your travel papers when you need to check in for your flight? Tripit puts all your travel papers, like hotel bookings, into one easy plan. You send your travel emails to Tripit, and the app makes a simple plan with a calendar. Tripit also gives you maps and weather for the places on your trip.

Cityseeker

Imagine finding anything you need, no matter where you are! Maps can get old, and guidebooks usually only show tourist places. Cityseeker tells you where local people go. Do you want sushi in

Singapore? Coffee in Barcelona? A tailor in Mexico City? The Cityseeker app helps you find these places. It uses information from local people to give advice on restaurants, shops, gas stations, landmarks, and more.

Unusual

Olympic Sports

For many people, the Olympic Games are about popular sports like swimming, running, or ice skating. But here are three unusual Olympic sports, and three athletes who love them.

Curling is a sport played on ice. Two teams of four players slide eight stones on the ice to a colored circle (called the house). The goal of the game is to put a stone closest to the center of the house. "I started curling when I was very young," said Canadian Olympic curler Sammy McCann. "My father worked at a hotel with an ice rink. When people left the ice, my friends and I would go on and start curling."

Children have been jumping on trampolines for almost 100 years. But trampoline only became an Olympic sport in the 2000 Olympic Games in Sydney. In the Olympics, each gymnast is judged on ten moves. A gymnast can get a good score by showing control of their body while jumping high, twisting, and flipping in the air. "I love the sport. I started when I was five years old," said Jennifer Parilla, an American trampoline gymnast. After Jennifer competed in the 2000 Olympics, she got a butterfly tattoo to remember her "new beginning" as an Olympian.

Skeleton racing first became an Olympic sport in 1928. In skeleton, racers slide down an icy track very fast on a small sled. The sled is called a skeleton because the first sleds looked like a human skeleton. "I didn't start skeleton until I was 30," said American racer Zach Gale. "One day, while driving, my girlfriend and I took a wrong turn at Lake Placid, New York — the place of the 1980 Winter Olympics. They were giving skeleton classes that afternoon. My girlfriend said, 'Why don't we try it?' It was fun! I loved it."

Life as a Student Can Be Expensive

Life as a student is often very expensive. The cost of university tuition is rising every year, and because students must spend so much time studying, they don't have much time to earn money. Fortunately, there are thousands of scholarships to help students pay their expenses. Usually, scholarships are given to students with excellent grades or strong sports skills. However, there are also some unusual scholarships that are not based on grades or athletics. Here are three examples.

The Tall Clubs International Scholarship

Students under 21 years old who are starting university for the first time can receive up to \$1,000 from Tall Clubs International. This club was created to bring tall people together and celebrate height. To apply for this scholarship, you must be tall: women must be at least 5'10" (177.5 cm) and men must be at least 6'2" (188 cm).

The Excellence in Predicting the Future Award

Adventures in Education is a company that gives money to students. Every two months, the company gives a scholarship to help students who want to study Economics. Students register online and use fake money to "buy" and "sell" predictions about the future, similar to buying and selling stocks. At the end of each two-month period, the students who earn the most fake money win real money to pay for college.

The Duck Tape Stuck at Prom Award

Wearing clothes made from sticky tape may not be fashionable, but it can win you money! High school couples who attend prom in original outfits made with Duck Brand tape can receive scholarships between \$500 and \$5,000. Students must design creative clothes and send a photo to the company's website. People then vote for the best outfits. Competition is strong, and winners usually make very creative designs.

A. Write your answers for the questions below.

2. Do you know anyone who got one?

3. If you could win a scholarship, what would it be for?

B. Match the words with their meanings.

The World's Oldest Universities

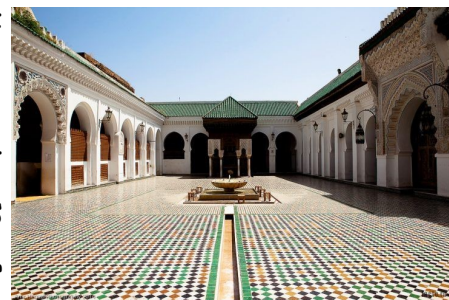

Many universities around the world are proud of their long history and traditions. However, only a few can truly say that they are among the oldest in the world.

Nalanda University, in Bihar, India, was established around 600 BC. It is considered to be the world's first university. In the past, students and scholars came from Europe, China, and all parts of India to

study science, medicine, Buddhism, and other subjects. Today, the university is in ruins, but long ago it was an impressive place with temples, classrooms, libraries, and dormitories for students.

According to the Guinness Book of World Records, the University of **Al-Karaouine** in Fes, Morocco, is the oldest university that still operates today. It was founded in 859 and became well known for the study of natural sciences. In 1957, after more than 1,000 years, Al-Karaouine added new subjects such as mathematics, physics, chemistry, and foreign languages to its traditional studies.

The first university in Europe was the **University of Bologna**, in Italy. It was one of the few European universities not influenced by religion. Professors were not allowed to teach out-

side the university, so students traveled from many countries to study with its famous teachers. Since it opened in 1088, the University of Bologna has never closed its doors, even during wars in Europe.

With the success of the University of Bologna, many other universities were founded across Europe. They were started by kings, religious groups, and former professors. Today, there are so many universities that students do not need to travel far; they can usually find one near their home.

Modern Engineering Wonders

Great Engineering has chosen five modern engineering wonders for our Excellence Prize. You can vote

for one and say why you like it!

Falkirk Wheel (Falkirk, Scotland, 2001)

The Falkirk Wheel is the only turning boat lift in the world. Its arms each carry a tank of water for boats. When the wheel turns, the arms turn too. This moves the boats up or down 25 meters. The wheel uses very little energy. One full turn uses the same energy as a microwave for three minutes.

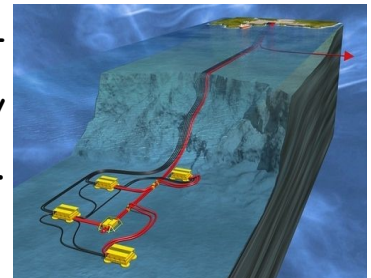

Millau Viaduct (Millau, France, 2005)

The Millau Viaduct is a bridge in the south of France. It is 2.46 kilometers long and 270 meters high. This makes it the tallest bridge in the world. It was built in only three years. The bridge is amazing and looks beautiful in the valley.

Langeled Pipeline (The North Sea, 2007)

The Langeled Pipeline is under the sea. It carries natural gas 1,200 kilometers from Norway to Britain. It is the longest pipeline of this kind. It gives Britain about 20 percent of its gas.

Three Gorges Dam (Yichang, China, 2008)

The Three Gorges Dam is the biggest dam for making electricity in the world. Its wall is 1.6 kilometers long and 183 meters high. It can hold 39 million cubic meters of water.

Venice Tide Barrier (Venice, Italy, 2014)

In 1966, Venice was covered by two meters of water. To stop this in the future, the Italian government is building 78 big walls. Each wall is about 600 square meters. When the sea water rises too high, the walls will go up to protect the city.
